 Type: _____

PIVOT HLO

DESCRIPTION

Pivot HLO modules offer smooth, elegant lighting with an impressive power output of up to 1000 lm/ft, perfect for areas that require an added punch of illumination. The HLO (High-Efficiency Lambertian Optic) Flush and Drop modules come in 1' to 8' increments.

PIVOT WALL WASH

DESCRIPTION

Pivot Wall Wash offers a fresh, two-tiered strategy to wall washing with its Total Internal Reflector (TIR) optic and a louver available in black or white. This approach results in an impressive minimal 5% light spill, which differentiates Pivot's wall wash from others. Pivot Wall Wash is almost as fluid as a gentle wall grazer due to its impressive uniformity. It comes in 1' to 8' increments.

PIVOT CLUSTER MRO

DESCRIPTION

Pivot Cluster MRO adds the beneficial precision and scalability of the Cluster family of luminaires to the Pivot Track Lighting System. Based on a 1.2" square form, Pivot Cluster modules offer two optic options—soft edge MRO (Mini Reflector Optics), and sharp edge MRO (Mini Reflector Optics), as well as three baffle options—square, hyperbolic, and conical.

PIVOT CLUSTER WALL WASH

DESCRIPTION

Pivot Cluster Wall Wash 1x5 adds the beneficial precision and scalability of the Cluster family of luminaires to the Pivot Track Lighting System. Pivot Cluster Wall Wash maintain the small cell look of Cluster MRO option for Pivot. Based on a 1.2" square form, Pivot Cluster Wall Wash features an asymmetric distribution and is offered in both black and white louvered options.

PIVOT DOT

DESCRIPTION

Pivot Dot is a round spotlight offered in two sizes, and features three beam angles of 20°, 35° and 50°. Pivot Dot emits a subtle punch of light with 360° infinite rotation ability along with 90° vertical flexibility. It can be adapter mounted or 3" stem mounted and is offered in 2.65" and 4" heights with two bevel options: standard and decorative. Pivot Dot is available in a wide range of colors.

PIVOT CELLA

DESCRIPTION

Pivot Cella brings clarity and rhythm to spaces through its vertical form. Available in 2" and 3" diameters, the slender luminaires are paired with acrylic diffusers offered in multiple heights and fully or partially frosted finishes, delivering visually comfortable illumination. Pivot Cella is suited to both accent applications and larger architectural installations, where repetition reinforces spatial organization and verticality.

PIVOT OBE

DESCRIPTION

Pivot Obe luminaires are available in three models—Obe Opal, Obe Hex, and Obe Prism—each sharing the same curved shade profile while offering a distinct low-glare optical effect. Available in multiple shade sizes and premium brushed metallic finishes, Pivot Obe luminaires can be specified for intimate settings or arranged into larger decorative compositions.

PIVOT SHELL ROUND

DESCRIPTION

Pivot Shell Round is a sleek, well detailed, and remarkably versatile pendant able to deliver general illumination in working spaces as well as task lighting over conference tables, in break or lunch rooms, and above circulation spaces. It is equipped with our Unity Pointed (UP) technology, which delivers lens brightness uniformity across all shapes and sizes within the same lumen output.

PIVOT GLOBE

DESCRIPTION

Pivot Globe offers uniform light distribution and the timeless appeal of the spherical form. Made from frosted glass, the luminaire is lit fully with our Isotropic Radiant Optic™ (IRO™) that distributes light smoothly and evenly in all directions, thereby avoiding undesirable hotspots. Available in 4", 6", and 8" diameters.

Technical Specifications

OPTICS

High-Efficiency Lambertian Optic (HLO)

Shielding of diffusing 0.075" thick acrylic provides up to 88% transmission and good obscuration. Matte white reflectors distribute LED output across the shielding. Luminaire brightness is controlled by the ratio of luminous flux to shielding area.

Wall Wash Optic (WW)

Wall Wash optics use multiple mid-flux emitters in a continuous array, supported by an angled board. An aluminum reflector collects and redirects emitter flux, while a refractive film adjusts both vertical and horizontal intensity and eliminates source image. The result is excellent uniformity up and down the wall, as well as between luminaires.

Soft-Edged Feathered Beam (SOF)

The Soft-Edged Feathered Beam blends the light into darker areas for a gentle brightness transition. Each LED emitter directs light through a single, custom molded circular optic using total internal reflection (TIR) to shape the light. A 0.5" reflective square louver provides a cut off with a UGR of 10. Three different TIR elements create a choice of beam spread: 25° narrow flood (NFL), 35° flood (FLD), or 55° wide flood (WFL).

Sharp-Edged Cut-Off Beam (REF)

The Sharp-Edged Cut-Off Beam creates dramatic impact, limiting the spread of light outside of the primary beam. A molded conical reflector redirects light from each emitter into the desired beam angle. A 0.5" reflective square louver provides a cut off with a UGR of 10. Three different TIR elements create a choice of beam spread: 15° spot (SPT), 30° flood (FLD), or 45° wide flood (WFL).

CircaFlex™ Optic

The Pivot Dot/Box/Cylinder CircaFlex™ Optic, at just 1.2", uses advanced beam-splitting technology to allow light to follow an intended optical path with maximal precision, minimal spread, and even distribution.

Isotropic Radiant Optic™ (IRO™)

The Isotropic Radiant Optic™ (IRO™) is a spherical lens designed with a spike-textured surface through which light rays are diffused outward and equally in all directions.

LIGHT SOURCE

Static white

LEDs are available in 2700K, 3000K, 3500K and 4000K with a choice of 80+ CRI, 90+ CRI, or 95+ CRI, with elevated R9 value for 90+ CRI and above. Color consistency is maintained to within 2 SDCM. All LEDs have been tested in accordance with IESNA LM-80-08 and the results have shown L80 lumen maintenance greater than 60,000 hours. Absolute product photometry is measured and presented in accordance with IESNA LM-79, unless otherwise indicated.

Full spectrum static white

The full spectrum LED option offers improved color particularly in the cyan region that is beneficial in both healthcare and circadian lighting strategies. The cyan region in full spectrum LED is richer at the 480 nm range.

WELL BUILDING STANDARD

WELL for Light: The WELL building standard focuses on light quality in several features. There are three categories that are fully attributed to the construction and features of a luminaire. In WELL V1, it's Feature 54 Circadian Lighting, Feature 55 Glare Control, and Feature 58 Color Quality. In WELL V2, it's Feature L03 Circadian Lighting, Feature L04 Glare Control, and Feature L07 Electric Light Quality.

This fixture meets Features:

- Feature 54 or L03 when full spectrum LED is selected
- Feature 58 or L07 when 90+ CRI or above is selected

All LED drivers used at Lumenwerx are deemed to have a low risk level of flicker, of 5% or less below 90Hz operational as defined by IEEE standard 1789-2015 LED.

WELL for Mind: This luminaire meets WELL for mind as it is a human centric luminaire offering quality light, excellent color, and smooth optics. If any of these features are incorporated in a luminaire, it can improve the ability to focus, concentrate, and persist longer on a given task. This fixture harmoniously operates in a space to assist the mind.

PIVOT MODULE

STATIC WHITE, FULL SPECTRUM

LOCKING MECHANISM

The Pivot module locking mechanisms are easy to use and ensure that each module is secured to the track.

There are three different types:

The V-Lock is activated with a simple push of a button located on the surface of the end cap adapter. To release the module, pull down the tab of the locking mechanism.

The H-Lock is activated automatically when the module is pushed in place. To release the module, simply push the two side buttons to remove from the track. A lockable H-Lock adapter is provided for modules specified with the emergency light section option.

The S-Lock is activated when the two slotted screws on the adapter are turned to lock in place. To release the module, simply turn the screws in the opposite direction to remove from the track.

CONSTRUCTION

Track adapter: Extruded aluminum, up to 90% recycled content

Module housing: Extruded aluminum, up to 90% recycled content

Reflectors: Cold rolled steel die formed, 95% reflective matte white painted

Diffuser

HLO: Extruded acrylic

WW: Extruded acrylic with optic overlay

Drop diffuser: Extruded with glued end caps

End caps: Die-cast aluminum

CERTIFICATION

ETL: Rated for indoor dry locations. Conforms to UL Standard 1574 and certified to CAN/CSA Standard C22.2 No. 250.0.

WARRANTY

Lumenwerx provides a five-year limited warranty on electrical and mechanical performance of the luminaires, including the LED boards, drivers, and auxiliary electronics. Lumenwerx will repair or replace defective luminaires or components at our discretion, provided they have been installed and operated in accordance with our specifications. Other limitations apply, please refer to the full warranty on our website.
