7/20" 7/20"

3/5" 3/5"

Locate mounting points [*] on the wall according to the client drawings.

2

Remove lenses (B) and place them in a safe place.

3

Disconnect LED molex connector (C) by taking a pointed object and pressing on the two tabs on the top. Unscrew and remove LED cartridge (D) to get access to the wall bracket.

4

To remove the wall bracket (E) from the fixture untighten the screws (F).

5 POWER SIDE

Pass the flexwhip through the wall bracket (E) and make electrical connections between fixture (A) and main power (G).

6 POWER SIDE

Screw the wall bracket (E) to the wall using anchors.
