THE CREATIVE SIX-SIDED LUMINAIRE

FEATURED PRODUCT

HEXP3D—Pendant With 3 Direct Cells
HEX3PI—Pendant With 3 Indirect Cells

FEATURED PROJECT

Campari America
Manhattan, New York City, U.S.

Hex

Hex is the distinctive and flexible six-sided luminaire for creative designs. Select from nine standard configurations of one-to-four luminous cells. Cell configuration determines the light distribution, from direct to indirect and all around. Each cell is illuminated by its own LED array with consistent light output and brightness across all cells.

The 2" wide panels – luminous and opaque – snap into the core armature providing nearly seamless transition from cell to cell, as well as access to LED arrays and driver. Cast endcaps support suspension cables and assure crisp detailing. Hex is available in sections from 2' to 12', and can be installed as a discrete luminaire or continuous run.

DISTRIBUTIONS

Direct, Indirect, Semi-direct, Semi-indirect and direct/indirect including ultra widespread beams

Distinctive
Hexagonal Profile

3.4" H x 4" W

LIGHTED CELLS

From 1 to 4 cells, one or two circuits the number of lighted cells determines total light output.

Multiple
Control Options

2" Wide Cells

CELL CONFIGURATION

Determines light distribution from a medium beam direct or indirect to light all around.
