# Obe Collection

VARIATIONS ON A SINGLE THEME

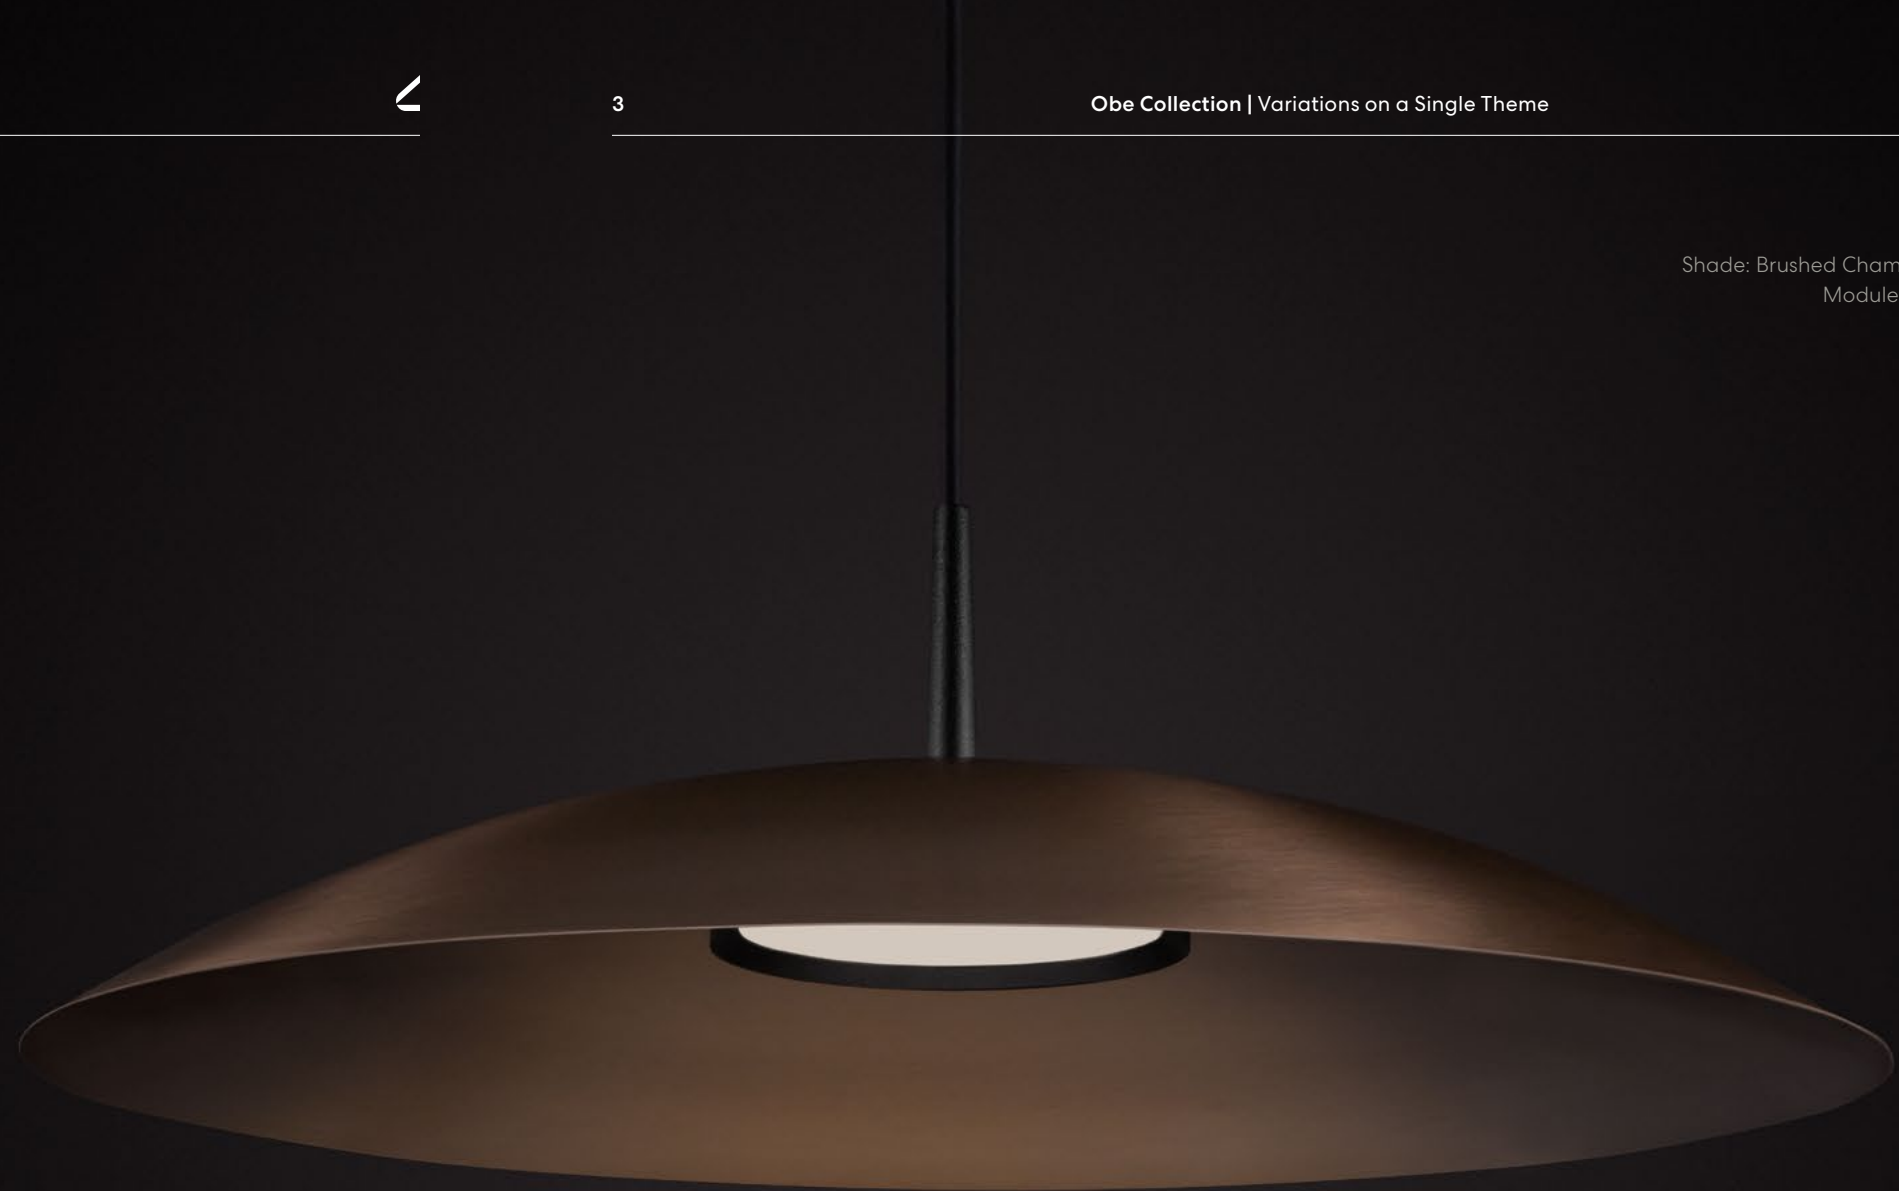

# Obe Collection

Obe is an architectural decorative luminaire designed to deliver controlled, comfortable illumination through a unified form. Defined by a gently curved shade, it moderates the light source, enhances visual comfort, and establishes a calm architectural presence.

The collection is offered in three optical variations—Opal with a High-Efficiency Lambertian Optic (HLO), Hex with a Hex louver (HEX), and Prism with a Precision Micro-Prism Optic (PMO).

Obe Opal  
Shade: Brushed Champagne Finish  
Module: Matte Black

3 MODELS

PREMIUM FINISHES

Brushed Metallic

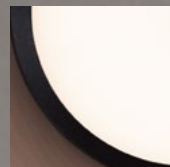

# One archetype ————— Three variations

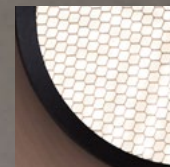

### OBE OPAL

The opal lens provides wide, uniform distribution with excellent visual comfort.

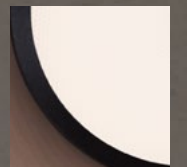

### OBE HEX

Hexagonal lens structure ensures precise light cut-off and visual comfort.

### OBE PRISM

Precision micro-prism optic engineered to provide controlled distribution and increased center intensity.

Obe Opal, Ø 18", Brushed Copper Finish

Obe shown in a suspended configuration, defining rhythm and spatial zones.

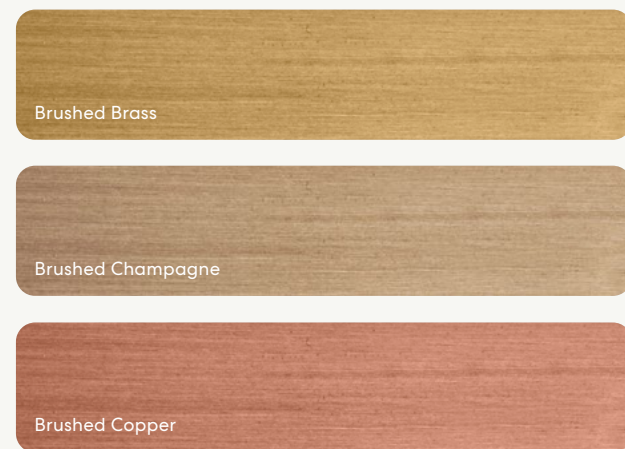

# Design Details

Obe is offered with premium brushed metallic finishes for the shade, paired with a gold anodized or black powder-coated module—each selected to reinforce its refined, architectural character.

Available in multiple diameters, the collection scales seamlessly from intimate settings to larger compositions, maintaining consistent proportions and visual coherence across all sizes.

ALSO OFFERED WITH THE PIVOT COLLECTION

# Obe Module for Pivot Track System

**OBE MODULES**

- Ø 8"
- Ø 12"
- Ø 18"

**PIVOT TRACK**

48V Magnetic Track

**PIVOT TRACK MOUNTINGS**

Pendant  
Surface  
Recessed

Obe fixtures are available as modules within the Pivot system—Lumenwerx’s architectural magnetic track platform designed to integrate multiple module types within a single framework.

**Pivot Track**

Pivot is a magnetic track system that accommodates pendant-, recessed-, and surface-mounted fixtures, supporting general, accent, and wall-wash lighting applications. Tool-free installation allows modules to be added or changed easily using a magnetic connection.

# Architectural Decorative Collections

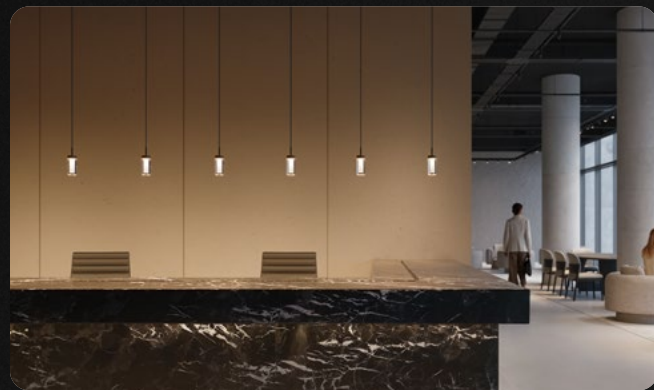

Obe sits within a broader range of architectural decorative luminaires from Lumenwerx.

Across pendants, rings, sculptural forms, and acoustic-integrated solutions, these collections support expressive applications while maintaining a consistent architectural language and standard of performance.

### Globe Collection

Globe is a fully illuminated sphere, available in 4" to 16" diameters.

### Cella Collection

Minimal decorative cylinders featuring an acrylic diffuser with fully or partially frosted options.

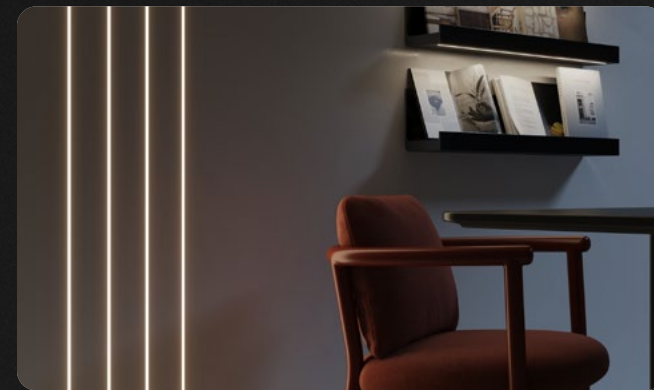

### Rim Collection

Four distinct profiles offered in geometric shapes and sizes for expressive architectural compositions.

### Shell Collection

Crafted for creative flexibility, Shell is available as a round, square, or linear fixture, in a variety of sizes.

### Minear Collection

Miniature architectural luminaires in linear and ring-shaped profiles.

### Pop Collection

Bright, efficient decorative luminaires offered in various shapes, sizes, and colors.

### Flair Collection

Cylinder luminaires with refined proportions and detailing.

### Acoustix Collection

Architectural luminaires combining light and acoustic control.
