# Poly

UNIQUE AND POWERFUL GEOMETRY

# Imagine a different way to shape light

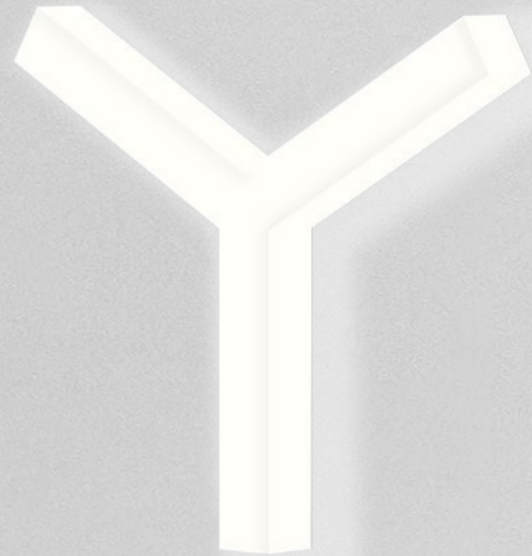

Poly introduces a distinct geometry in LED luminaires with intriguing geometric forms and crisp luminous elements. Appropriately scaled for use as discrete luminaires, Poly offers creative options for both decorative and general lighting.

# Poly, a Distinct form of light

As pendant, surface or wall-mounted luminaires, Poly offers rectangular, triangular and Y-shaped configurations, which can distinguish a variety of special areas. The open forms are airy (drivers are remote) and can easily take on regular or free-form arrangements. Energy-efficient operation with 18% to 30% uplight and a wide range of electrical options make Poly both attractive and practical.

## Recessed

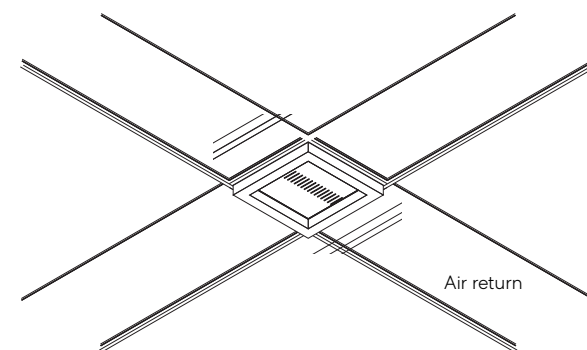

Poly is offered in 1'x1', 1'x4', and 2'x2' sizes and with either regressed 2-sided diffusers that form a shallow coffer, or 3-sided diffusers that drop below the ceiling.

As a modular recessed luminaire suitable for open or private offices, a Poly 2'x2' delivers 2500 to 4500 lumens.

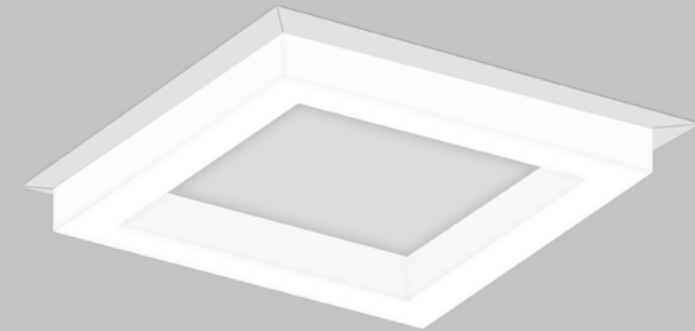

### SIZES AND SHAPES

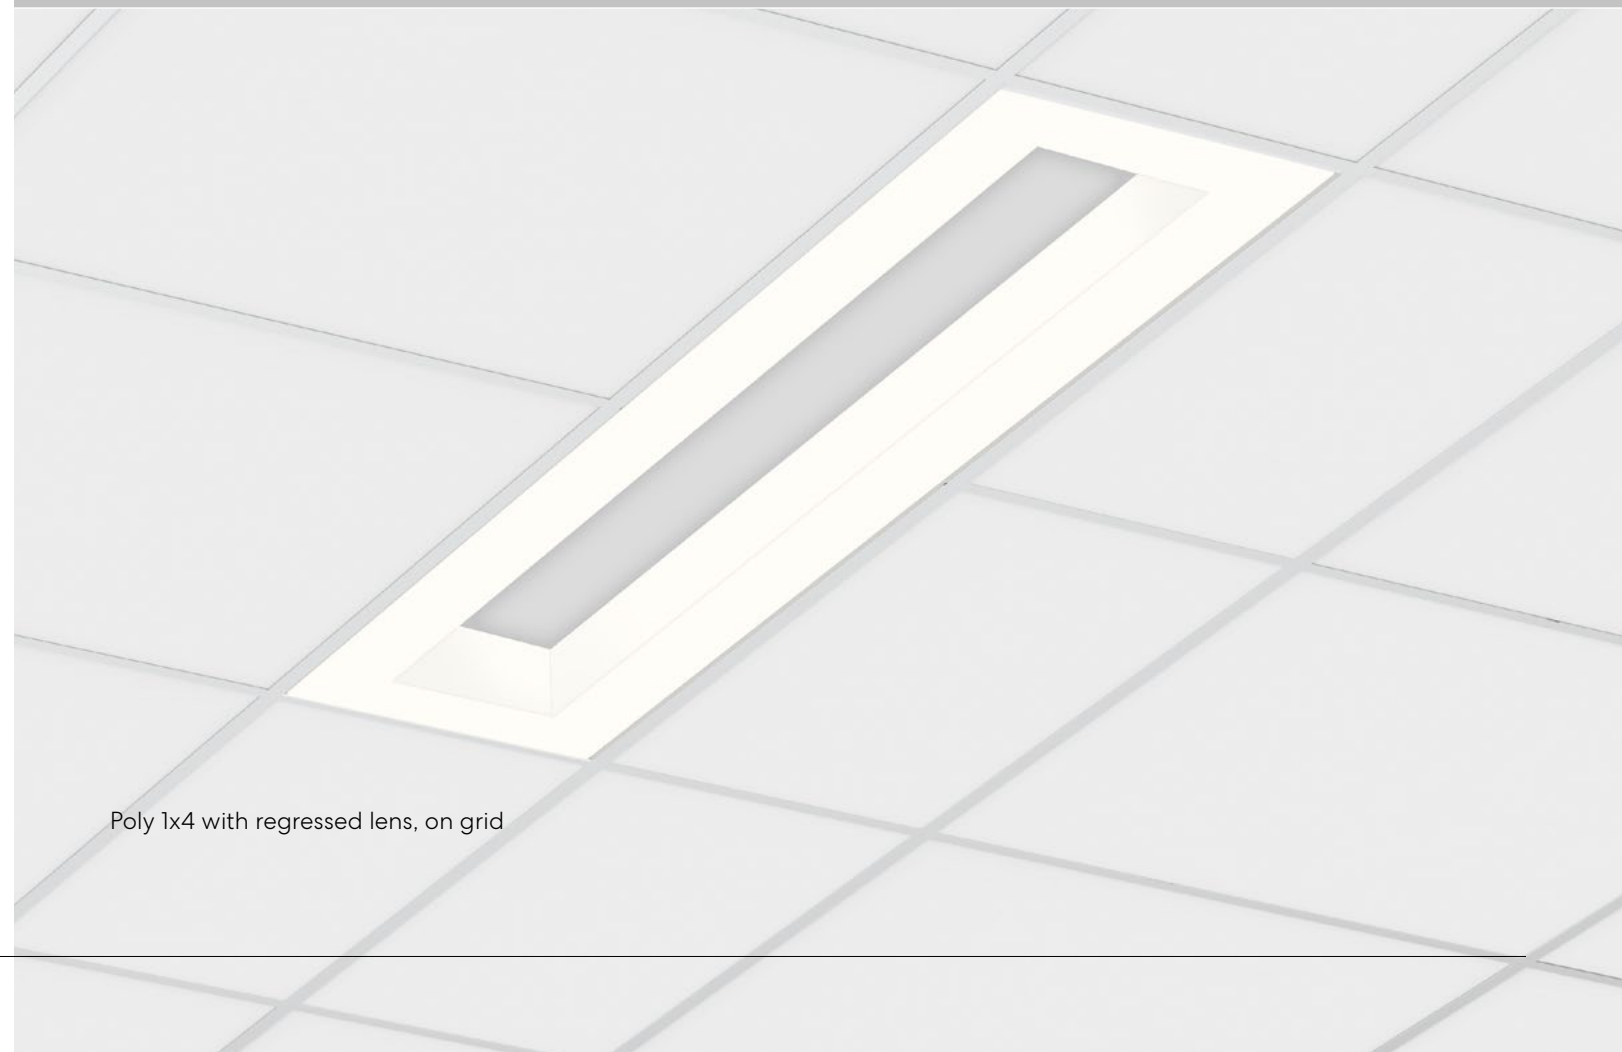

### UTILITY PLATES

Recessed Poly features a center utility plate that subtly integrates air return diffusers, as well as third-party connections, such as sprinkler heads or speakers by others.
