

# Steplight

PRECISION ILLUMINATION  
FOR EVERY STEP

# Steplight

Our oval and rectangular wall-mounted steplights are crafted to facilitate easy navigation within healthcare facilities. Both designs offer adaptability to various architectural preferences, featuring horizontal and vertical faceplates. Choose from multiple options to customize the lighting according to your facility's requirements.

## Polycarbonate Lens

The 90-degree cut-off design ensures precise illumination without unwanted light spillage, enhancing safety and comfort for patients and staff. Engineered with durable polycarbonate lenses and shallow housing, these lights meet ADA requirements while delivering consistent performance in healthcare environments. With a 1.5W output, our steplights provide energy-efficient lighting solutions tailored for healthcare settings. Elevate the navigation experience in your facility with our steplights—blending functionality, reliability, and compliance in one convenient package.

## Shallow Housing complies with ADA Requirements
